Breeding Stock Grading Worksheet

Keep it simple! Give the animal +1 point for a positive answer (yes) and -1 point for a negative answer (no). Add up the total at the end and rank the animals by score. The animal with the lowest score should be the first animal culled.

Animal #/identification:						
Does she breed back on time?						
Does she give birth on time? (with the rest of the group)						
Did she wean a healthy offspring this year?						
Does her offspring meet desired characteristics?						
Is she within the prime production age?						
Is she healthy? (average)						
Is her body condition good in normal conditions?						
Does her body type fit with the rest of the herd?						
Is she easy to handle/work?						
Total Animal Score
